# 'AL' FOSTER FIRST IN ANGLERS' HEARTS

Pioneer of Deep Sea Fishing Made Study of Places Where Fish Congregate.

STARTED TRIPS IN 1866

Untiring in His Efforts to Find New Grounds in Local Waters.

Foster! What a name to conjure Who in the last forty years or to has gone deep sea fishing but familiar with him personally or

His position among fishing captains and pilots is unique indeed for he stood in a class by himself—no man in his particular line ever achieved more, or for that matter as much, as this dean of deep sea fishing pilots in New York waters.

His record is a page filled with fishing successes, with the record of untir-ing efforts to locate new grounds—efforts that were rewarded with the un-precedented popularity that came to him and remained with him up to the time

of his death.

In personality "Al" Foster was a quiet man and one whom you would not take to be a seaman to judge by his appearance, though, as a matter of fact, he knew more about the Fishing Banks than any other man.

There are a myrind of anglers who

than any other man.

There are a myriad of anglers who salled with him on the Dolphin, and later, on the renowned Angler, who remember him on still earlier boats, and it is my good fortune to be able to present a complete record of the boats he salled in, as set forth in the American Shiphuilder of Oct. 21, 1905, through the courtesy of Captain "Bill" Allen of the Tankee Doodle of Sheepshead Bay.

## First Went to Banks in 1866.

This journal says: "A. G. Foster, or as he is better known. 'Al' Foster, chartered and ran the Silas O. Pierce on Bunday, May 20, 1866. In 1867 he ran soveral times; in 1868 he had the Charles Chamberlain, 1869 William Tittamar and such big boats as the State of Maine and Rip Van Winkle. This was in 1870; in 1871 the New Champion and Eliza Hancock. The last of the big boats which ran to the Banks with success was the Monitor."

About this time the Fulton Market

About this time the Fulton Market for capturing the porgies down East and keeping them in pounds until wanted, thereby driving the big boats out of fishing excursions, and in the meanwhile thinking it advisable not to risk op-

position against these large craft, ex-cept running early in the season.

On one of these occasions he had the pleasure of seeing two of the best fishing steambout pilots of that time, one of them having charge of the Virginia Seymour, the other of the Only Son, both boats being under charter by Foster, he being unable to accommodate re than 400 on one boat, so he hired

more than 400 on one boat, so he hired the latter vessel.

The result of that day's catch being one bergall and one lobster, 'Al' made up his mind that he would try to learn to locate the reefs and rocks that he had heard old smack fishermen talk about as being off shore in the places where the regular big boats had run about three months in the year.

That was off Seabright, around and mear what is now called the snar buoy.

mear, what is now called the spar buoy immense numbers of porgies a few sea bass and beachfish at such places as are now known as the Highlands, Rocky Hill, the off shore places of the Staten Island in and off shore

of, but by the knowledge of to-day it possible to catch all kinds of fish their season all the year around. The special pilots that they had in those days (Anderson Colwell and Sam Greenwood) called the Cholera Banks, or a small part of the same, Eastern Sanks. We have also a series of places off Sandy Hook Lightship, the Mussel Grounds off Long Beach, the Iberia wreck, the Middle Grounds, the Northwestern and the Southern Cholera Banks, all of which constitute part of the Eastern Banks; and to locate these ridges it took years of hard work and

In 1873 "Al" Foster, by agreement, managed the Charles Chamberlain during the summer months; in 1874 he ran the William Fletcher, Virginia Seymour and Seth Low. In the early part of 1875 he ran the Virginia Sey mour to Sandy Hook dock and the

last chartered vessel he ran was the Seth Low, which was run on June 5, and after which he managed the Seth Low for six years.

Low for six years.

It was on Thanksgiving Day of that
year he ran the first codfish trip that
was ever made by any steamboat from his port fishing for cod in these waters. In the fall of the year 1881 the Set Low was sold to the Astors, who wanted her down South "Al" had to look for enother boat, which he secured in the Snother hoat, which fishing being poor George Kelsey, but fishing being poor that season she quit running in Sep-tember. Then he managed the Marion, sodfishing that fall, but instead of catch-

Fun for those kinds of fish.

Early the next year there was an greement made between J. W. Hancock and Fester to run the J. B. Schuyler;

1888 he bought the Angler, which he ran to the fall of 1891, when the Al Foster Steamboat Company was formed, which was dissolved in 1897. Foster be coming sole owner of the Angler until this year, when it was changed to the

Mountain Lion Killed by Hunters With Bow and Arrow.

DR SAXTON POPE and ARTHUR H YOUNG STANDING ALONGBIDE MOUNTAIN LION KILLED IN THE SIERRA NEVADAS WITH 66 INCH YEW BOWS PULLING 75 POUNDS. THE ARROWS FIRED AT A DISTANCE OF 20 YARDS

# LION KILLED WITH **BOWS AND ARROWS**

Pacific Coast Archers Take 100 Pound Animal With Indian Weapons.

Saxton Pope and Arthur H. Young, of whom The Sun told last July of killing a bear with bow and arrow, have added a bear with bow and arrow, have added a mountain lion to their trophies

Both men are disciples of the old school of archery. The mountain lion was killed with two darts from their quivers while hunting in Tuolumne county, Cali-

at the buck mountain lien, both arrows flying true, one piercing the animal's lungs and the other the heart. The ar-rows went clear through the lien, which fell dead after running only a few yards. The lion weighed about 100 pounds. He was bayed after a chase of a mile. The arrows were fired at a distance of twenty yards from 66 inch yew bows

pulling seventy-five pounds.
So far as the records of archery in
this country show, this is the first time
a lion has been killed by a white man

with a bow and arrow.

It is the view of both these hunters that the bow is an effective weapon, but hat it takes months of practice to be

that it takes months of practice to be able to shoot it well.

Both these hunters began with small game, rabbits, quall and squirrel, and then they gradually added to their bar skunk, fox, deer and bobcat. The 10 pound mountain lion, because of the danger attached to this hunting, is the most difficult trophy so far secured, part to ifficult trophy so far secured, next to the bear.

Bureau of Biological Survey for the purpose of encouraging the raising of rab-bits in domestication as food, a practice which has long been followed in Europe. There is a full discussion of the utility breeds of rabbits, which is comprised in three types represented by the so-called "Giants," the Belgian hares and the New Zealand red rabbits.

States Give Job to Uncle Sam.

WASHINGTON, D. C., Oct. 25 .- The States of Minnesota, Wisconsin, Iowa and Illinois have decided to let the Bu-reau of Pisheries assume entire charge of the rescue work of fish along their boundaries, and have made available their holding stations and are rendering assistance in distributing the fish

The End of the Trout Season

The Angler was a boat that was especially liked by fishermen on account of her top deck being so arranged that you could walk all around it.

Louis Harm.

Old timers too, will recall "Al's" brother Fred, who had the fish finding instrument, who used to be purser.

Another very remarkable thing about this famous host was her singular good fortune for she seldom had any sort of socident.

There's the brock we followed after. With its finding waters cool. There's the ripple of its laughter. There's the ripple of its laughter.

But—it's over now—and the reason why we put away our fles.

And the only thing now in season is to six and—any our lies.

L WARREN HARPER.

# Doings of Local Anglers With Rod, Reel and Line

Joseph Rindskopf writes of the final social formaskoji writes of the man trip of We Twelve Fishing Club last Sunday as follows: "Capt. Holmboe look us to the lightship and the way the big blacke and sea bass came aboard was a great surprise to all of us.

"I have in mind one particular fellow that has every one beaten in catching big blackfish that I have ever seen. Some will say: 'Well, he uses crabs for ball; that is the reason he gets the big ones," I have seen this fellow surrounded.

must get them. The captain smiled all day watching his busy people yank up the splendid 3 to 5 pound blackfish.

fishermen were talking about. We got some 2 and 3 pound hake and some pound bergalls and a very few whiting. so we went back to our old spot and there picked up some more fine big

"Very few ling were caught, which I am glad of, as the ling, in my opinion, is the meanest fish that swims. One of our boys remarked to me that when a ling is caught he is 'dead.'

# Time to Salt Down Fish.

"Now is the time to salt down whiting hake and ling," says "The Man With the Leather Panta," who writes as follows: "On board the Jo3 Pinkett on Sunday at the lightship, forty anglers boated a rec-ord catch of whiting, hake and ling. It was an ideal day for the sport and many boats were on the grounds. The first prize was won by Billy, the blacksmith, with a hake of 5 pounds. John, the skipper, won second prize with a hake of

pounds.
"The writer had a catch of 12 whiting. Rahbit to Supplement Meat Supply

"The writer had a catch of 12 whiting,
10 hake and 4 ling, which was a poor
catch in comparison with the messes of

'Now is the time to get good carches of these fish and they should be saited down for the winter. It is easily done. "Clean your fish, removing all traces of blood. Wipe clean, out in four or five pieces of good size and salt in a good stone crock, of say, four gallons capac-

quarter inch thick in the pieces of fish, tightly, with another layer of sait and more fish. Weight down with a good more fish. Weight down with a good stone (not limestone), and leave until a heavy brine has formed, which should take about three days.
"Then add fresh water to make the brine. Cover the fish for one inch, and

use as wanted, always keeping plenty of brine in the crock, "Some conger cels are still being

caught, and may be pickled with spices and vinegar, which makes a very tasty dish. I sent this recipe to the Press cunners. The some years ago. How many have 6 pound hake.

# Who Is Best Blackfish Angler!

Doings as follows: "While en route to vember Seventeen Fathoms recently for black- says: Seventeen Pathoms recently for blackfish there arose a discussion among some fishermen as to who in their opinion was the best black fisherman. By that they meant not the fisherman who occasionally catches a big mess, but one who catches blackfish steadily, and big fish too, even though they are scarce.

"Some say it is luck; but it is more than luck when a man can outclass his says: "Only wild deer having horns to says: "Only wild deer having horns not less than three inches in length may be taken in Ulster county and in the towns of Neversink, Cochecton, Tusten, Highland, Lumberland, Forestburg and occasionally catches a big mess, but one who catches blackfish steadily, and big south of the Newburgh and Cochecton tumpike in Sullivan county and the town of Deer Park in Orange county."

balt; that is the reason he gets the big ones. I have seen this fellow surrounded by fishermen and every one was using crabs and still they had no luck, but he kept recling blackfish in. There is only only just to say that the say the say that the say one solution, and that is, that he knows
